## Peyronie's Disease Symptom Checklist

Peyronie's disease can have various symptoms and most patients do not have all of them at any given time. Use the checklist of common symptoms below to help your doctor understand what you are experiencing. This will help them to decide what the best possible treatment options are for your specific case.

**Curvature with hardest possible erection of approximately \_\_\_\_\_ degrees**  
*(assume perfectly straight shaft is 0 degrees and a curve straight up is 90 degrees)*

**Firm lumps**

How many? \_\_\_\_\_

Where is it located? \_\_\_\_\_

**Firm ridges or veins running down or around the shaft**

How many? \_\_\_\_\_

Where is it/they located? \_\_\_\_\_

**Pain with erections**

On a scale of 1 to 10 how severe is the pain? \_\_\_\_\_

**Loss of erection firmness**

The entire shaft is not firm

The shaft is firm to a point, but beyond that it is semi-firm

**Loss of length or girth**

When erect

When flaccid.

**Indentations in the shaft or an hour glass shape to the shaft**

**Difficulty penetrating for intercourse**

**Psychological effects**

Depression

Anxiety

Other \_\_\_\_\_

Use this area to note any thing else you have noticed

## Questions for the Doctor

Most of us have visited our doctor and remembered the one question we really wanted to ask five minutes after we left. Using this tool will help make sure that you are prepared for your appointment and that you remember all of your questions.

Doctors are commonly asked the questions below about Peyronie's disease. Check off the questions you want to be sure to ask:

- My penis has started to curve when I have an erection, why?
- I have pain when I have an erection. Is this common?
- How did I get this condition?
- Are the lumps cancerous?
- Will I be able to have a penis straight enough to have sex again?
- What are the different treatment options?
- The psychological impact of this condition has been as bad or worse than the physical problems, is this typical and how can I get help?

Use this area to write down your specific questions.

## Progress Report Card

Before each visit with your doctor use this helpful tool to record the changes you have seen since your last visit. You might be surprised how quickly you can forget about symptoms as they improve. This list will help to identify improvements in areas that you may have forgotten about, or symptoms that are not improving that you need to talk to your doctor about.

Date: \_\_\_\_\_

Pain level with erection on a scale of 1-10 \_\_\_\_\_

## About Your Insurance Reimbursement

Many insurance companies reimburse our patients for their medication, but some do not. Prescription Dispensing Laboratories cannot be responsible for collecting your reimbursement for you. The items listed below may help you ascertain your coverage and limitations as well as provide you with information to assist in obtaining reimbursement. Ask your insurance representative all of these questions:

### Questions to Ask Your Insurance Carrier:

- 1) My doctor has prescribed Transdermal Verapamil 15% Gel, a compounded medication. Does my plan cover compounded prescriptions?
- 2) If so, does it cover (NDC# 38779-0275-04) Verapamil HCl in a compound medication?
- 3) As this is a proprietary, patented, sole source prescription medication, I am required to go out of network and pay “out of pocket.” Does this alter the percentage of reimbursement? If so, how?
- 4) At what rate am I covered? What percentage of coverage can be expected?
- 5) Upon filling my prescription, PDLabs pharmacy will provide a universal claim form and paid invoice to submit for reimbursement. Does my plan have a specific form which is to be filled out? If so, please send several to my address. If not, please confirm the address that submittals must be sent to.
- 6) The length of treatment is expected to be 9 to 12 months. Is there a restriction on my plan for the number of days supply allowed for out of network, compounded prescription medications?
- 7) Is a prior authorization required for reimbursement?
- 8) Will you please provide your name and direct extension?

Please write down the name of the person you spoke with, their extension, the date and time of the conversation, and any specific answers that were given so that you may contact that same person for follow-up at a later date if needed. If the person you are speaking with will not answer these questions or is unaware of how to respond, ask to speak with a supervisor or manager.

- Most states have sole source laws protecting patients from insurance companies who attempt to deny payment simply because a drug cannot be provided within their system. PDLabs is the only pharmacy licensed to compound Transdermal Verapamil Gel. It is not legal for insurance companies to refer their patients to in-network pharmacies or to attempt to compound this medication.
- Denial based on ‘off-label’ use, i.e., the FDA has not approved it for this indication, is not a valid denial reason since insurance companies regularly reimburse for the off-label use of many drugs (e.g. erythromycin, an antibiotic, to treat bowel motility problems and amitriptyline, an antidepressant, to treat pain). Most do not know what the drugs were prescribed for since they were billed over a computer system from a pharmacy.
- Denial on the basis that the medication is compounded is not valid because you have a legal and valid prescription for a medically necessary treatment.
